

New Credit Card Login *and* Payment System

As part of the recent enhancements to your Liberty Bank Visa credit card, we have introduced CardHub, a brand-new system for managing your credit card account.

CardHub has replaced MyCardStatement.

If you previously accessed your credit card account through the MyCardStatement website, please discontinue using that site or any saved bookmarks.

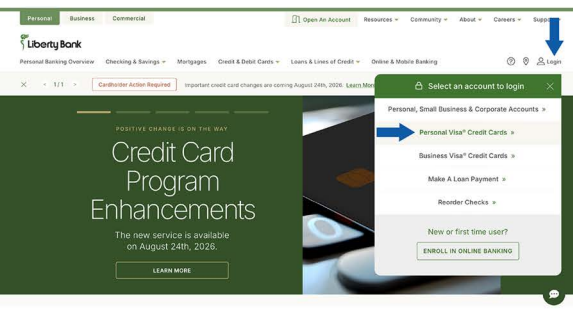

Going forward, you will access your credit card account through LibertyBank.net.

Accessing CardHub for the First Time

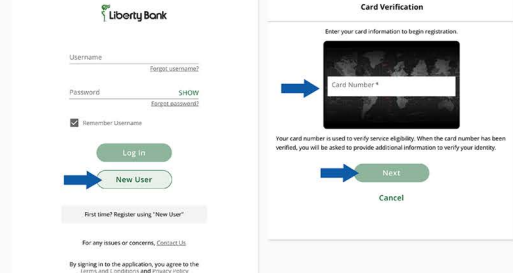

Because CardHub is a new system, all cardholders will need to register as a new user, even if you previously had a MyCardStatement account.

To get started:

1. Visit [LibertyBank.net](#)
2. Click **Login**
3. Select **Personal Visa Credit Cards**

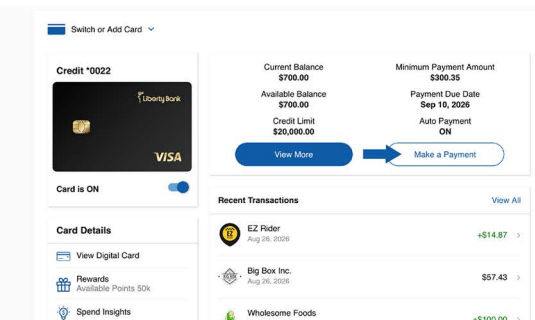

4. Follow the prompts to register for CardHub using “New User”

Once registered, you can use CardHub to:

- View your credit card transactions and account information
- Review statements
- Make credit card payments
- Manage your payment settings

Important: Re-establish Your Payment Settings

Your previous MyCardStatement settings do not automatically carry over to CardHub. If you previously established automatic payments, recurring payments/drafts, or saved payment information, please review and re-establish those settings in CardHub.

Additionally, if you use your Liberty Bank Visa credit card for recurring payments with other merchants or service providers, be sure to update those businesses with your new card information to help avoid interruptions.

Please Remember

Do not use MyCardStatement to access your Liberty Bank credit card account. Instead, begin at [LibertyBank.net](#), click Login, and select Personal Visa Credit Cards to access CardHub.

We understand this requires you to register and set up your payment preferences again, and we appreciate your attention as we transition to the new system.

Thank you for banking with Liberty.
